SAUCERS ETCETERA

In the following digest of data received Your Secretary has made a conscientious effort to determine the source of the original story, from its context, divorced from semantics. As a former reporter, former publicity man, advertising man and sometime master of word-twistery, he feels rather competent to take the syntax apart.

The digest is divided into three sections. 1. Objects the papers called "saucers". 2. Objects the paper called "meteors". 3. Objects the papers did not know what to call, but refrained from calling either "saucers" or "meteors".

Some duplication may have crept in, but the aim has been to supplement the "saucer" data which appeared in DOUBT No. 23, No. 24, and No. 27, and to bring it up to date.

The statement is that "flying saucers" or "flying discs" or "flying disks" were the subject of "news" stories as follows:

1947 = 17 FS

July 4, Cincinnati *Enquirer*, UP. Reference is to a letter in the San Francisco *Chronicle*, signed Ole. J. Sneide, alleging that the "saucers" were "space ships from older planets".

July 10, Cincinnati *Times-Star*, AP. Man named Long in Van Nuys, Calif., found something in his garden.

Same date, INS, New York. Walter Winchell is quoted in favor of "belief". Alleged that something "went though the supersonic wall where it was traveling in space ahead of itself".

Aug 29. Two staff members of the Cincinnati *Enquirer* reported lights in the sky. The news services appear not to have picked the story up for their member-papers.

Nov. *Amazing Stories,* on its back cover, cites a sighting off Cape Race, Nov. 12, 1887.

1948 = 18 FS

Jan. *Amazing Stories,* on its back cover, cites a sighting over Greer, Idaho, Feb 5, 1910.

Mar 15. NSL, Union County, N. J. Flash and blast.

June 27, *Idaho Daily Statesman,* by Dave Johnson. An "anniversary" article stating that the "mystery" was one year old as of June 24.

July 25, UP. Philadelphia *Bulletin* and Philadelphia *Inquirer,* referred to what was reported in Atlanta, Ga., by two Eastern Air Line pilots. The same story, reported by AP, was in the Victoria, British Columbia, *Daily Times* the previous day. It was sent to us by Kenneth Arnold (MFS).

Walter Winchell (said to favor a Russ source) and BSRA (the crowd of spirit-communers in Calif which publishes double-talk about life on "other planes", not meaning airplanes, but levels of immateriality).

METEORS

Concurrently with the long series of accounts employing the word "saucer", other stories of lights in the sky appeared without that word. The papers used "meteors" or "fireballs" to describe these others, and all too frequently mis-used the term "meteorite" for something seen in the air. Tell your reporter friends that a meteor does not become a meteorite until it is on the ground.
